

CIRCULAR HEAD MAYOR DARYL QUILLIAM'S MESSAGE 7 AUGUST 2018

Congratulations to Barry King who was recently awarded the Lions Club Citizen of the year for 2018. This award was well deserved by Barry for the many years of hard work he has put in at the Wyndarra Centre. Barry has been a volunteer at Wyndarra since the early days of the centre operating and whenever I visit Wyndarra, Barry is always there to greet me with a smile on his face. This award was well deserved and I want to congratulate all office bearers for another successful year for the Lions Club of Smithton.

Last week together with three councillors and our General Manager Scott Riley I attended the Local Government Association of Tasmania Annual General Meeting and conference in Hobart. This year we were fortunate enough to win an award for Local Government Excellence for Councils below 15,000 people for the Art About Town program. I was particularly proud to receive this award on behalf of our community development staff, who along with the help of our local community committee do a fantastic job organising this great event that inspires our community. Thanks to a number of people including our schools and local businesses for promoting this event each year. Again I look forward to this years' event, which will be held next month.

It's now just over a week until the Science Gig event, which is held every year as part of National Science Week. The Science Gig is on Monday 13 August at the Community and Recreation Centre from 5.30-8pm. Entry forms can also be collected for the Science Trail competition and are available from the Council office or on our website. These should be returned by 10 August with winners to be announced on the night.
